

PRESS RELEASE

FOR IMMEDIATE RELEASE, dated 8th March 2011

Magrathea congratulate all the winners at this year's ITSPA Awards held on 7th March

This year's award ceremony, sponsored by Magrathea was held at the BT tower, a spectacular backdrop for these prestigious awards.

Award Winners were:

Best Consumer VoIP: Voiptalk

Best Business ITSP (SMEs): iNet Telecoms (Voipfone)

Best Business ITSP (Large Enterprise): Virgin Media Business

Best VoIP CPE: Grandstream - GXV3140 IP Multimedia Phone

Best VoIP Infrastructure: Genband - GENiUS

Most Innovative VoIP Product: Gradwell – Gradwell Mobile

Those Highly Commended were:

Best Business ITSP category (SMEs): Gradwell

Best Business ITSP (Large Enterprise): Timico

Best VoIP Infrastructure: Broadsoft - Broadworks

Most Innovative VoIP Product: Vonage - Vonage Mobile for Facebook® App

ITSPA was formed in March 2004 as a trade association to represent UK-based network operators, service providers and other businesses involved with the supply of VoIP services to business and residential consumers within the United Kingdom and across the European Union.

Officially launched in December 2004, ITSPA aims to promote competition and self-regulation in order to encourage the development of a flourishing and innovative VoIP industry.

Linus Surguy, Magrathea's Technical Director, said, "Magrathea is proud to continue its support of the ITSPA Awards and would like to congratulate all the winners this year. It is important that we recognise the achievements of the industry and encourage more competition for the future."

Notes to the Editor

Magrathea is the UK's leading supplier of managed next generation voice services to industry. The group of companies was founded in 1995 to provide a wide range of telecommunication solutions and services and has extensive connectivity both inside the UK and Ireland with switching facilities in London Docklands, Bristol and Dublin giving access to virtually unlimited bandwidth as well as access to the best carriers in the world. Its technology is entirely developed in house but draws upon industry standards and utilises industrial strength components for full carrier grade reliability. Sample products include PSTN number hosting, number portability as well as providing telephone numbering and linking IP customers to the worldwide PSTN telephone network.
